## Education

### JSS Academy of Technical Education

Masters of Computer Applications

Noida, UP

2022-24

### School of Management Sciences

Bachelor of Computer Applications

Varanasi, UP

2018-21

## Experience

### Frontend Developer Intern

July 2024 - Oct 2024

#### Axeno Consulting

- Gained hands-on experience with HTML, CSS, JavaScript, and Typescript.
- Worked with Adobe Experience Manager AEM to build and manage dynamic websites.
- Learned and utilized version control using Git for effective code management.
- Designed and developed multiple responsive websites, ensuring cross-browser compatibility.
- Collaborated with cross-functional teams to implement and test new features, contributing to seamless project execution.
- Enhanced user interfaces to improve overall user experience and increase engagement.

## Projects

### Task Manager | HTML, SCSS, Typescript

Aug 2024

- Designed and developed a Task Manager using **Typescript**, **HTML**, and **SCSS**
- Implemented task **prioritization** logic (High, Medium, Low) for effective workflow management.
- Added **search functionality** for quick task lookup, and enabled management of completed and deleted tasks.
- Integrated **sort-by-priority** and **filtering** features for a streamlined user experience.
- Leveraged JavaScript **local storage** for persistent task management across sessions.
- Focused on clean code practices and modularity.

### CareerBoost: Elevating Job Seeker's success | HTML, CSS, React, Node, API

Feb 2024

- Spearheaded the development of CareerBoost, a comprehensive **job search platform** tailored for job seekers.
- It was a group project where I primarily focused on the **front-end part**.
- Integrated advanced resume features and **ATS checks**, significantly increasing user interview chances.
- Added a **notes section** for downloadable interview guides in PDF, offering users a valuable resource hub.
- Increased task completion by 40% with a user-friendly **to-do list feature**.
- Pioneered **JSON** for **robust data storage**, boosting data retrieval speeds by 50%.
- Teamed up with job listing **API**, offering users real-time access to 100+ job opportunities.

### Weather Dashboard | HTML, CSS, React, API

Jan 2024

- Initiated the project to develop a responsive weather application using **React JS** and **OpenWeatherMap API**
- Developed front-end components using **React JS** to create dynamic and interactive weather displays.
- Integrated OpenWeatherMap API to for **real-time temperature, humidity, and wind speed**.
- Incorporated user suggestions and feature requests to enhance application functionality.
- Implemented modular code structure and best practices to facilitate easy maintenance and extension of functionalities.
