Education

JSS Academy of Technical Education

Masters of Computer Applications

Noida, UP

2022-24

School of Management Sciences

Bachelor of Computer Applications

Varanasi, UP

2018-21

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Software Engineering
- Database Management
- Web Development
- Object Oriented

Projects

Trendies: An Ecommerce Website | HTML, CSS, React, Node, MongoDB, Express

Apr 2024

- Spearheaded the development of a **MERN**-based e-commerce clothing app catering to men, women, and kid
- Orchestrated seamless user authentication, reducing login/sign up processes to under 5 seconds with a success rate of 99.9%.
- Integrated an intuitive cart system, achieving a page load time of less than 3 sec and minimizing cart abandonment to below 30%.
- Designed and configured sections for diverse demographics, offering a minimum of 5 size options per clothing item.
- Engineered real-time pricing displays with accuracy within 1% to ensure transparent and dynamic shopping experiences.
- Employing agile methodologies to prioritize tasks and optimize development efficiency.

CareerBoost: Elevating Job Seeker's success | HTML, CSS, React, Node, API

Feb 2024

- Spearheaded the development of CareerBoost, a comprehensive job search platform tailored for job seekers.
- It was a group project where I primarily focused on the front-end part.
- Integrated advanced resume features and ATS checks, significantly increasing user interview chances.
- Added a notes section for downloadable interview guides in PDF, offering users a valuable resource hub.
- Increased task completion by 40% with a user-friendly to-do list feature.
- Pioneered **JSON** for robust data storage, boosting data retrieval speeds by 50%.
- Teamed up with job listing **API**, offering users real-time access to 100+ job opportunities.

Weather Dashboard | HTML, CSS, React, API

Jan 2024

- Initiated the project to develop a responsive weather application using **React JS** and **OpenWeatherMap API**
- Developed front-end components using React JS to create dynamic and interactive weather displays.
- Integrated OpenWeatherMap API to fetch real-time weather data, including temperature, humidity, and wind speed.
- Incorporated user suggestions and feature requests to enhance application functionality.
- Implemented modular code structure and best practices to facilitate easy maintenance and extension of functionalities.

Keeper App | HTML, CSS, React

Dec 2023

- Developed a note-recording website using **React**, breaking down its functionality into modular React JS files for seamless implementation across different platforms through simple imports.
- Successfully stored and secured over 25 notes, providing easy retrieval for users.
- Received positive feedback from 8-9 individuals who reviewed the website, with each participant giving at least a 4 out of 5 rating.

Technical Skills

Languages: C, C++, Python, Java, JavaScript

Databases: My SQL, MongoDB

Web Technologies: HTML/CSS, Node JS, React JS, APIs, Tailwind CSS

Developer Tools: VS Code, GitHub, Netlify

Certifications

Complete JS Bootcamp | JavaScript in 7 days | Udemy

Jan 2024

- Course offered by Udemy that covers: Basics of JavaScript which covers data types, functions and many more.

Java (Basic) from HackerRank | HackerRank

July 2023

- An assessment test certificate from HackerRank.

SQL (Basic) from HackerRank | HackerRank

Sept 2024

- An assessment test certificate from HackerRank.
